making you smile for over 75 years

Practice Update

Welcome to our very first patient newsletter

Now is an exciting time for the all the team here at Horbury Dental Care as we have opened our 3 brand new surgeries. Thank you for your patience and support during the building work that has been taking place over the last couple of months. We are now able to offer more appointments and more advanced treatments.

There's no need to worry as this will not affect our current NHS provision. Francois Vannerem, one of our associate dentists has now decided to focus on providing private care and will therefore no longer be seeing his NHS list.

If you were an NHS patient of Francois', you will have received a letter with details of the changes. If you wish to stay registered with Francois as a private patient, please contact our friendly reception team who will be more than happy to help.

Patients are our priority at Horbury Dental Care so please get in touch with us if you have any queries regarding the new changes at the practice.

Reception Team

Please be mindful if you feel the need to be seen urgently, please call the practice at your earliest convenience as we prioritise emergency appointments for those who are; in pain with swelling, bleeding, unable to eat or sleep. Due to high demand, we may have to book patients in with a different clinician, we appreciate your frustration, and the waiting times may be longer than usual.

If patients are unable to attend appointments, please call us on 01924 211234 with as much notice as possible. Missed appointments on the day may acquire a charge from £21.00.

We thank you all for your patience and support during the last couple of years.

MEET THE NEW TEAM MEMBERS

Matthew Phillips BDS (Manchester) MSc
(University of Kent) MJDF RCS (Eng)

Matt graduated from the Turner Dental School in Manchester in 2011, where he was awarded the Tom Pitt-Ford prize for his work. Matt continued his education by completing an MSc in Primary Care Dentistry from the University of Kent in 2014 and becoming a member of the Joint Dental Faculties.

Matt has previously worked in a specialist restorative unit at the William Harvey Hospital as well as a number of practices across the South East. Matt relocated to be close to family in Yorkshire and joined Horbury Dental Care and Implant Clinic in 2021. He is committed to preventive dentistry and communicating all patient's treatment options to them.

Matt has a young daughter who he spends most of his spare time with, discovering new places and walks around West Yorkshire.

Any new recommendations are welcome!

Jordan Hobbah BDS MFDS RCS (Eng)

Jordan is a true Yorkshire gentleman who hails from Drighlington. He studied at Newcastle Dental School and qualified in 2019.

He spent his first year post qualification working in a general practice just North of Newcastle and gained valuable experience in all areas of general dentistry.

For the past year Jordan has worked as part of the head and neck surgical team at Pinderfields Hospital. The team treats problems such as broken facial bones, facial lacerations and surgical extractions, and so Jordan has gained many more skills to add to his portfolio of experience. He has also recently gained his Membership of the Faculty of Dental Surgery qualification. Whilst not working Jordan enjoys going to the gym and watching sport. He also likes a real ale, preferably a Yorkshire brewed one!

Jordan is part of the Willings family as he is married to Harriet and is very much part of the family. A very welcome addition to the team.

Job opportunities

We are always expanding here at Horbury Dental Care and are keen to have more team members join our award-winning practice. Please send CV's to willings@horburydentalcare.co.uk and check social media pages for updates.

DISCOVER YOUR SMILE

Align

Our systems offer brilliant results without the need for permanent braces. Differing from traditional teeth aligning methods such as braces as it consists of virtually invisible and fully removable aligners. Free from wires and brackets, they do not affect your diet or brushing habits allowing you to eat all your favourite foods and keep your teeth feeling clean throughout your treatment.

Whiten

The UK's most trusted teeth whitening brand, built by a dentist with over 20 years' experience. Boutique whitening provides the most effective and comfortable, professional teeth whitening experience available. First step is to come in for a check-up and your dentist will examine your teeth and gums to make sure your teeth are ready. You will then collect your trays and start using them at home with your whitening gels. In two to three weeks, you can unveil your beautiful new smile.

Shape

Composite bonding (also known as tooth bonding or dental bonding) offers a solution for minor damage or gaps in teeth. Bonding is usually used for filling chips, fractures, or gaps between teeth, or for fixing discolouration. A composite resin is attached to a tooth and shaped to restore its original appearance. The colour of the resin is matched to your teeth, so it will appear as though it is a natural part of the tooth. Composite bonding is a non-invasive treatment used to correct a range of minor aesthetic imperfections on the teeth. Most commonly, Composite Bonding is a treatment for chipped teeth, irregular teeth correction, tooth gaps, or discolouration.

We are pleased to announce Helen has returned to work part time after becoming a mum.

Did you know that Helen offers facial aesthetics as well as dentistry work? We have dedicated slots on these days. Please ask the ladies on reception for more information.

Facial Aesthetics

* The progression from cosmetic dentistry to facial aesthetics came naturally to me in 2017 following a number of patients asking how to improve their overall appearance once completing their smile makeover.

Facesthetics ethos is to - PREVENT the signs of ageing - RESTORE what nature gave you and BALANCE and enhance your facial features to give natural, subtle results so you can BE YOUR BEST.

Our treatments vary from medical grade skincare which reduces the signs of ageing and treat skin conditions such as acne and rosacea but also rejuvenation treatments such as LED light therapy and micro needling to remove pigmentation and scarring.

We also offer a variety of injectable treatments to reduce the signs of ageing and filler treatments to define, shape and balance your facial features - helping frame that new and important smile!

To see more examples for Helen's work, take a look at the teams faces!
