

# Horbury Dental

care & implant clinic

making you smile for over 75 years

## Francois Vannerem

BDS Dip Rest Aesthet Dent (BAARID) MFDS RCS (Eng) MCGDent

Dentist with enhanced skills in Restorative-Aesthetic and Ortho-Restorative Dentistry

Our associate dentist Francois has been treating patients at Horbury Dental Care since 2015 when he graduated from Newcastle Dental School.

Since then, he has completed a Diploma in Advanced Restorative Aesthetic Dentistry and now routinely carries out more complex restorative treatment at the practice.

Francois has enhanced skills in Ortho-Restorative Dentistry and is a key opinion leader and teacher for Dentsply Sirona, as well as being a board member of their PEERS orthodontic group.

With Francois' extensive training he is suited to manage referrals for complex restorative and aesthetic cases as well as those requiring mild-moderate orthodontic correction prior to restoring.

### How to Refer:

To make a referral please visit our website [www.horburydentalcare.co.uk](http://www.horburydentalcare.co.uk) or email [willing@horburydentalcare.co.uk](mailto:willing@horburydentalcare.co.uk)

If you would like to discuss a case before referral or would like some advice please feel free to contact Francois on [francois.vannerem@horburydentalcare.co.uk](mailto:francois.vannerem@horburydentalcare.co.uk).

## Treatments offered:

General restorative dentistry

Full mouth rehabilitations

Toothwear

Aesthetic Dentistry

Smile Makeovers

Ortho-restorative dentistry/short-term ortho

Bioclear black triangle closure composites

# Example Cases

## Case 1

Severe lower toothwear case opposing upper porcelain, treated with crown lengthening of the lower teeth to increase the clinical crown height, followed by temporisation at an increased OVD. We then carried out some extractions and replacement of defective work, lower anterior zirconia crowns and posterior replacement implant crowns/bridges to level the occlusal plane.

Before

After

## Case 2

Generalised severe wear case and deranged occlusion. This was treated with milled crowns at a raised OVD, incorporating retention features in the metal-work to enable an excellent fit and retention of the chrome dentures.
